Hiring Manager
Pomfret School
398 Pomfret Street
Pomfret, CT, 06258-0128

Dear Hiring Manager:

I'm writing to apply for the Academic Technology position listed on the Connecticut Association of Independent Schools website. My background brings together classroom teaching and hands-on technology support, with experience helping faculty and students effectively use LMS platforms, classroom systems, and instructional tools in live school environments.

In my recent role at Covenant Prep, I worked alongside the technology lead to support faculty and students with LMS configuration, access issues, and day-to-day platform troubleshooting. I also developed practical documentation to help non-technical teachers resolve common issues independently, improving overall adoption. In addition, I piloted AI-assisted instructional tools in the classroom, documenting outcomes and sharing findings with staff. Previously, at Minerva University, I provided front-line support for a globally used LMS, resolving issues across audio/video functionality, user access, and course configuration. I also bring hands-on experience with classroom A/V systems, including projectors and smartboards, ensuring reliable setup in active instructional settings.

What I bring is a balanced perspective across both teaching and technology. I understand the importance of reliable systems, but also the need for tools to be usable and supportive of instruction. This allows me to work effectively with faculty, translate technical issues clearly, and contribute to environments where technology supports teaching rather than interrupts it.

I would welcome the opportunity to contribute to Pomfret's academic technology team and support faculty and students in making effective use of the tools available. Thank you for your time and consideration.

Sincerely,

Richard Waweru Maina.
